

The theme for this years British Science Week is:

Innovating the Future

At EVS we will start the week off with a Science Day on google classroom on Friday 5th March where the children will have lots of activities to choose from. This could be an experiment, poster, research, a family challenge or designing and making something for the future.

During the week 8th - 12th March the children will take part in science activities with their class in school including designing a lab coat to show what science means to them. We look forward to sharing some of the science work with you.
